INTRODUCTION

01 INTRODUCTION

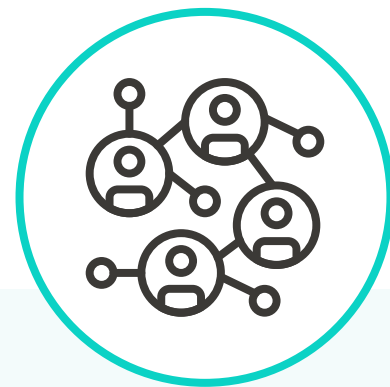

ALG Solutions is a multi-disciplinary group of 70 dedicated professionals committed to delivering innovative solutions to our clients' evolving challenges by providing systems and capabilities you can do business with.

We are comprised of:

- experienced lawyers, paralegals and legal executives
- technology experts
- project managers
- business analysts
- operational and system administrator experts

02 OUR CORE CAPABILITIES

Legal resourcing

Legal professionals from a wide range of backgrounds, with highly relevant skill sets provides ALG Solutions with the versatility and dynamism to respond effectively to your most challenging review and process intensive projects.

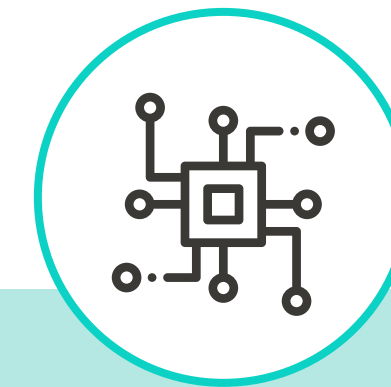

Transaction diligence and execution

We support due diligence projects, Standard Contractual Clause reviews, M&A deals, loan sales and repapering projects at scale.

Litigation and investigation delivery

We support the scoping, delivery, technology and data needs of complex regulatory investigations and High Court discoveries. We lead the market, providing novel solutions that leverage Artificial Intelligence to solve our clients' most complex investigation and litigation data challenges.

Technology

We provide market leading applications and specialists for your transactional, regulatory and due diligence projects. We leverage technology to deliver smarter and more efficient solutions to our clients.

Project management

We provide client facing project management support to help our clients deliver their strategic mandates on time and on budget.

03 WHY US?

ALG Solutions offers a uniquely integrated delivery model that ensures a seamless combination of legal expertise, technology, process efficiency and project management.

Largest team in the Irish market with over 70 professionals offering unmatched scale

Market leading transactional and contentious project delivery experience

Seamless integration with ALG expert legal teams

Every project is **scoped, planned and budgeted** thoroughly prior to execution and delivery

Advise on **best** and **most efficient** technology to use for the project

Only law firm in Ireland to provide tailor-made custom solutions to client challenges

Deploying machine learning models at scale to deliver market leading efficiency

Provide detailed reporting ensuring total transparency on every project

A deep and **unique understanding** of legal risk and how best to manage it

THE PROCESS: HOW TO ENGAGE WITH ALG SOLUTIONS

04 OUR APPROACH

How do we work?

ALG Solutions delivers and supports many types of common legal situations. We provide solutions to common client problems across all business areas from transactional support to litigation and investigation support. We also support unique, novel or once-off projects that require a mixture of our services.

In order to deliver a wide variety of projects simultaneously to the highest standard, we use a unique integrated delivery model (IDM) across all projects.

What is our IDM?

Our IDM is the process through which we support and deliver all our projects. At a high level, it consists of four steps:

- Scoping / Initiating
- Planning, reporting, and budgeting
- Legal analysis and project delivery
- Project completion and close

Does every project follow the same path?

Not every project we oversee neatly follows the same path to delivery, but they do all follow a consistent IDM framework.

ALG Solutions deep legal expertise coupled with our multi-disciplinary team and IDM framework means we are uniquely positioned in the market to deliver legal and compliance projects of any scale or complexity without the need for third party support.

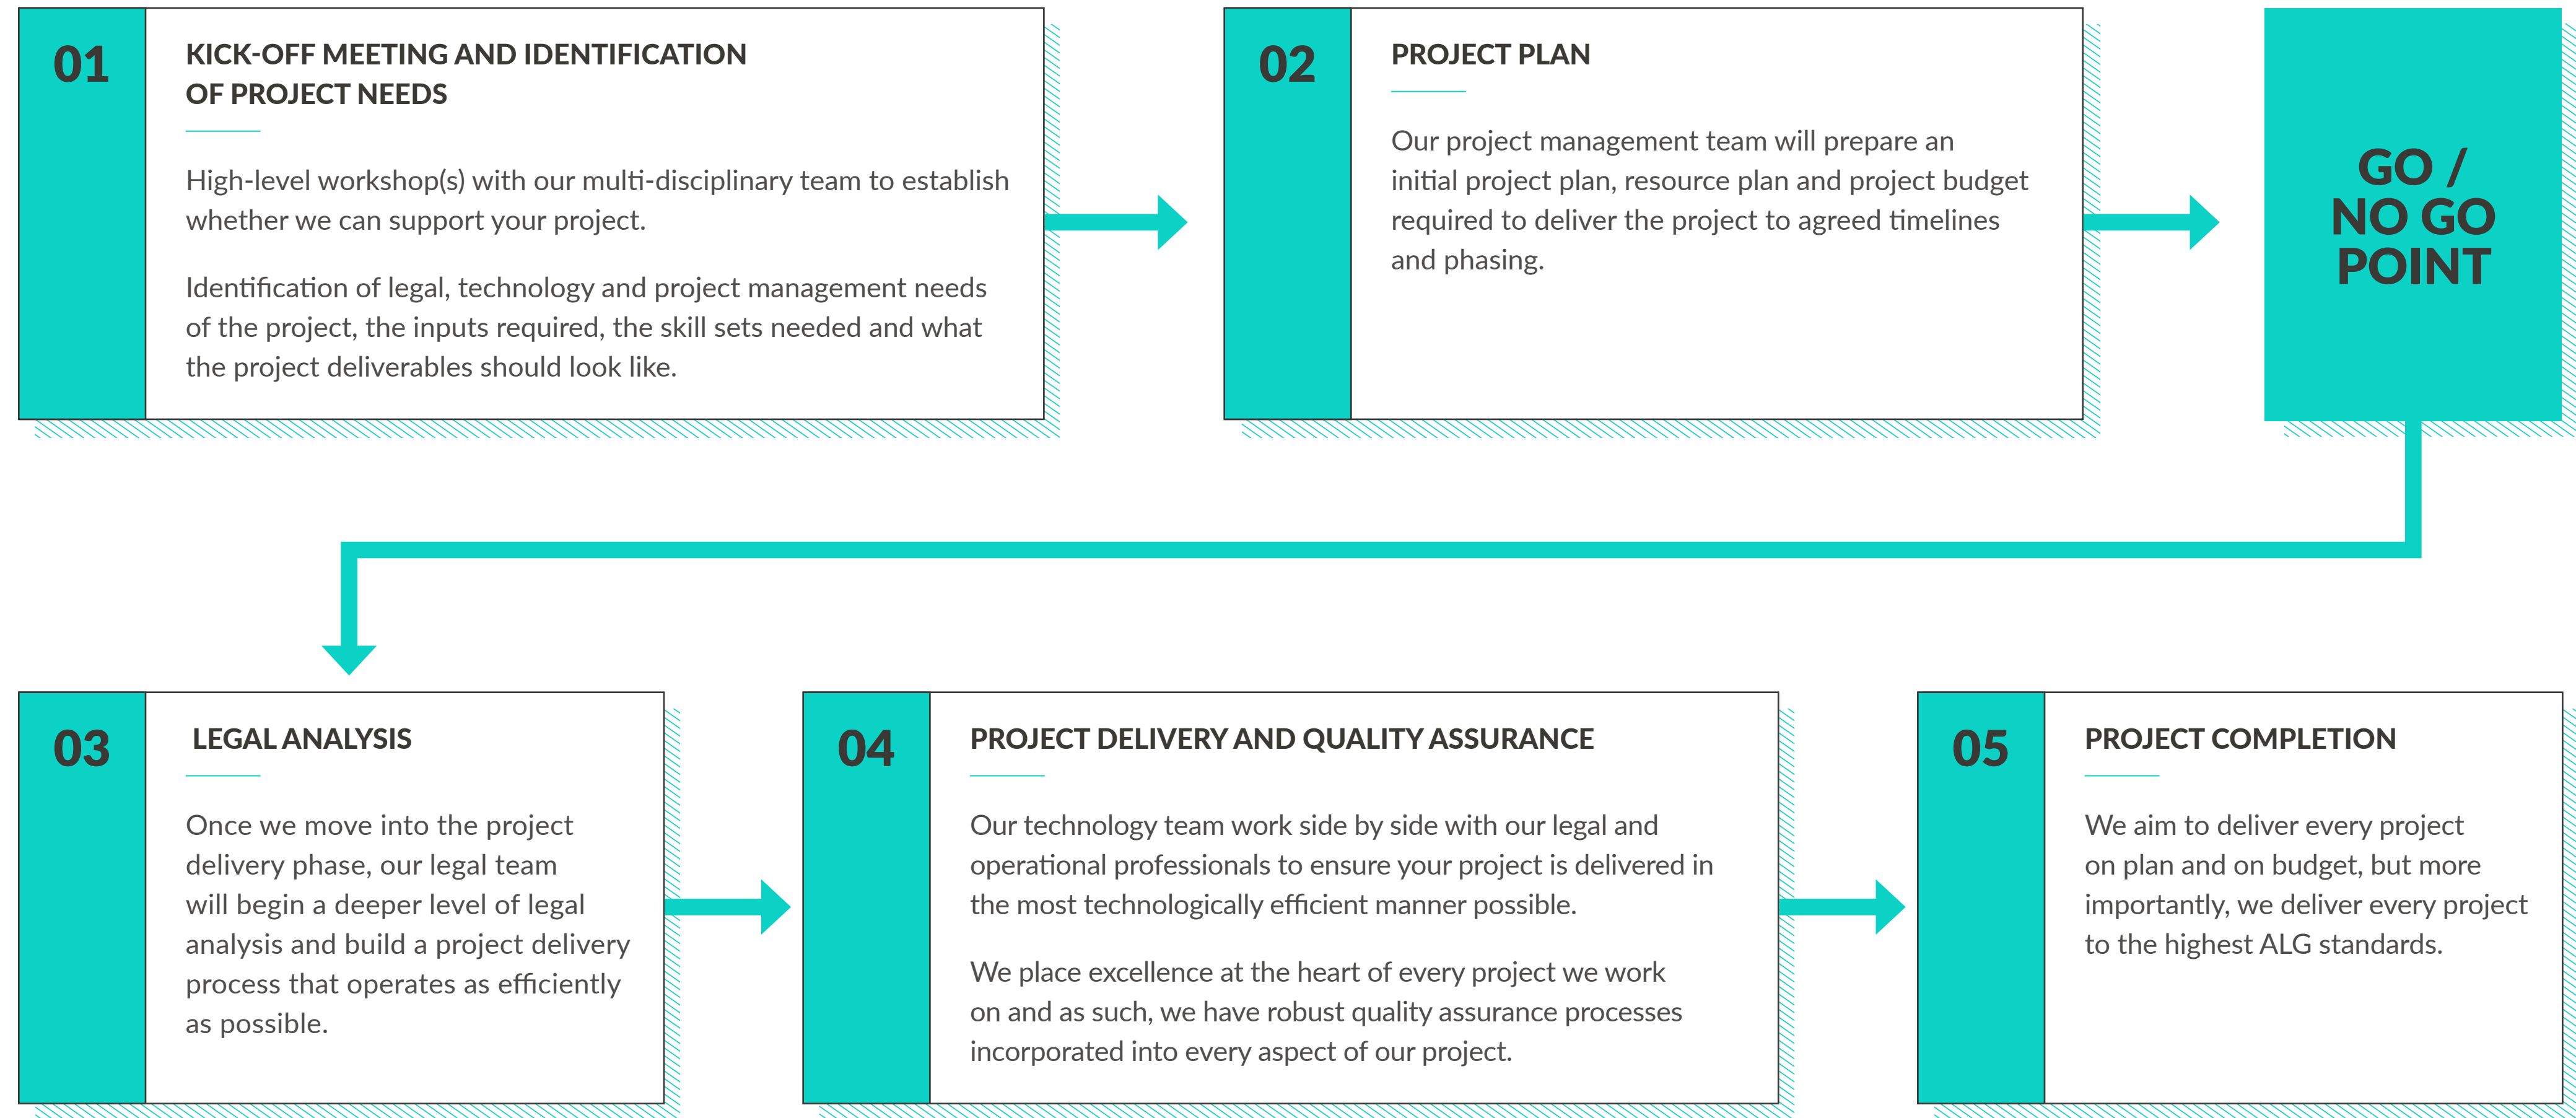

Do we only support large projects?

No. Our flexible staffing model allows us to support projects of all sizes, please reach out and contact us to discuss your needs. If the project is something we do not support, we will quickly identify this and suggest who may be able to assist you.

Why ALG Solutions?

We combine our legal expertise with systems and capabilities you can do business with to provide a unique offering to meet all your legal, technology, and project management needs on your legal and compliance projects.

05 WHAT WE DELIVER

06 WHAT TO EXPECT

ALG SOLUTIONS IDM (Integrated Delivery Model)

A key cornerstone of our IDM is early engagement to ensure the project is properly scoped and resourced with key dependencies identified. This significantly mitigates the legal, complexity and resource risks associated with the delivery of challenging projects.

Budget for project

We provide detailed project budgets and assumptions for every project.

We track project assumptions, costs, and project changes and provide regular reports to ensure all stakeholders are aligned.

Plan for project

We ensure every aspect of our project delivery is properly planned and properly resourced.
